

# CAMERON PARISH

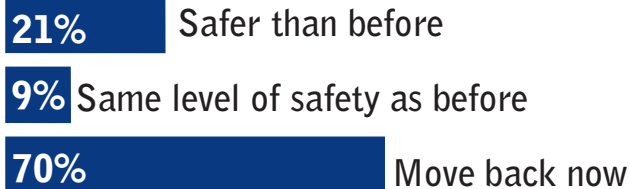

Cameron residents listed improving schools, attracting new business, and developing housing as their priorities. The parish seat is located in a high-risk area and of the Cameron residents who attended the meeting, most stated a willingness to rebuild those public buildings. It is the sentiment of some that areas of commerce must be rebuilt, even though they are in a high-risk/high-damage area.

## Effects of Rita

Cameron was one of the most devastated of all Louisiana parishes. Over 60% of buildings suffered damages, and the parish experienced an evacuation of over 1,000 households.

## WHEN WILL WE RETURN?

## WE TREASURE...

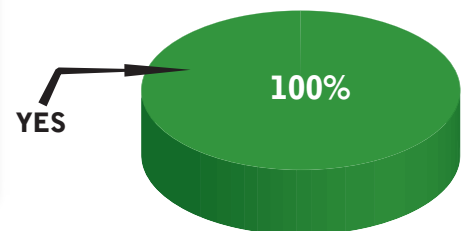

...our school system and our coastal cheniers. Our marshes and wildlife are important, including Holly Beach, the bird sanctuary and our wildlife refuges.

## PARISH TOP PRIORITIES:

- #1 Improve the schools
- #2 Encourage development of new housing
- #3 Attract new businesses to the area
- #4 Restore coastal areas

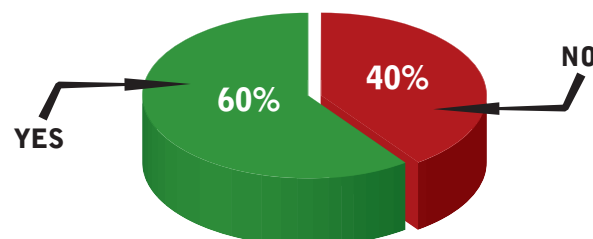

Should we ensure the ability to return to original home site?

## WE STRONGLY AGREE

- 100% We should rebuild public buildings that are in high-risk areas
- 100% Zoning and land use plans should be used to guide rebuilding
- 100% Flood protection should not be prioritized over other needs
- 100% Changing our parish plans is an option if it makes the region stronger
- 77% We should **rebuild first in high-risk areas**

Are some areas too risky to rebuild?
